WORK EXPERIENCE

2.4 years

Maugry

A project-oriented company specializing in blockchain solutions

Frontend developer   01/2022

- Made UIs for two blockchain systems.
- Made a large and complex UI for a system that automates selling on marketplaces via their APIs. Used MUI, Apollo, and GraphQL.
- Made an electron app for the Nyagan museum's info kiosk. Created games with SVG graphics and CSS animations for it.
- Made an electron app for the Pustozersk museum's info kiosk with video and audio state management, CSS animations and offline speech recognition in three weeks. Used Python, Vosk and Framer Motion.
- Researched Openlayers integration with React and made a boilerplate for a mobile app via Apache Cordova.
- Helped a Junior developer to grow professionally. Reviewed his code.

Xsolla

The international company making tools for video games commerce (e.g. payment system)

Outsourced frontend developer   08/2021–12/2021

- Created UIs for projects of a data science team.
- Researched graph visualization JavaScript libraries.

TECHNOLOGIES

Main stack:
- JavaScript
- TypeScript
- React
- SCSS

Additional:
- Vite
- Create React App
- Nx
- Gulp
- Electron
- Redux
- MUI
- Ant Design
- Storybook
- Graphin / G6
- Apollo / GraphQL
- Axios
- Figma
- Apache Cordova
- Openlayers
- Docker
- Next.js
- Python

SKILLS

- Creating complex user interfaces via the SPA approach

PROJECTS

Metrics hierarchy:
- A web app for data scientists that renders graphs in a browser.
- Has a prototype deployed on GitHub.
- Made with TypeScript, React, Ant Design and Graphin.

ETIS 2.0:
- A browser extension improving the UI of the Perm State University's information system.
- Distributed via Chrome Web Store. Has nearly 800 active users at this moment.
- Made with JavaScript and CSS.

SGi Hacker Tools:
- A browser extension improving the UI of the Small Games website.
- Made with TypeScript, CSS, and Gulp.

EDUCATION

Higher School of Economics
Master of Science
Digital Humanities
Perm, Russia
2021–2023

Perm State University
Bachelor of Science
Fundamental Computer Science and Information Technology
Perm, Russia
2016–2021

Additional:
- Understanding TypeScript - 2023 Edition
- Xsolla School 2021 Front-end course
- Xsolla Summer School 2020 Front-end course
- Xsolla "Garage" Summer School 2020

- Making browser extensions
- Implementing advanced React concepts such as custom hooks and portals
- Writing predictable, maintainable, and flexible code using well-designed components and SSOT architecture
- Configuring frontend projects via Nx and Gulp
- Understanding the core concepts of web design
