WORK EXPERIENCE

Multimedia Solutions Lab
A project-oriented company specializing in blockchain solutions

Front-end developer   01/2022

- Made a UI for a blockchain analytics system with custom React components.
- Currently making a large and complex UI for the system that automates selling on marketplaces via their APIs. Working with MUI, Apollo, and GraphQL Code Generator on this project.
- Set up two monorepo projects via Nx.
- Helping a Junior developer to grow professionally (started working with him when he was a trainee). Reviewing his merge requests.

Xsolla
International company making tools for video games commerce (e.g. payment system)

Outsourced front-end developer   08/2021–12/2021

- Created interfaces for the new experimental services of the data science team.
- Researched graph visualization JavaScript libraries that can be integrated with React.
